Yung-Chuan Huang : Art of Traditional Chinese Flower Arranging before purchasing it in order to gage whether or not it would be worth my time, and all praised Art of Traditional Chinese Flower Arranging:

Since there is a lack of research on the subject, Mr. Huang cleverly turned to ancient Chinese paintings to discover how flowers were arranged during the various dynasties and also to understand what was considered aesthetically pleasing at different times. This book describes the interesting philosophy behind traditional Chinese flower arranging, and both the numerous color photographs and the lively descriptions serve to illustrate how these aesthetics can be brought into our lives. It is clearly and beautifully written, and does not read at all like a translation. It is apparent from the unusual clarity and crispness of the text that Ms. Phillips devoted a great deal of effort toward achieving accuracy and beauty in her translation. The entire book is extremely accessible and fascinating, and I would recommend it highly to anyone interested in either Chinese art or flowers.
