5 of 5 people found the following review helpful. Only 33 pages and HUGE print.By Judy Kay FriederThis book was 33 pages long with HUGE print. I think it is way over priced for the slim amount of information contained in the book. I was disappointed. At the same time I ordered this book I ordered two books by Brenda Griffith on Fused Glass and they were much more detailed and much better value for the money. One of the books was 221 pages for about the same price and had so much information. The other beginner's book was a little bit smaller book, but had so much more information and contained patterns as well. Both of these books provided much better value.21 of 23 people found the following review helpful. Way overpriced!!By LindaThis little paper back book has 29 pages that are triple spaced. There is very little information. I would think this book should sell for less than \$10. If I had been in a book store and seen the actual book, I wouldn't have bothered buying it even at \$10.3 of 4 people found the following
