Bernard S. Mason : Boomerangs: How to Make and Throw Them before purchasing it in order to gauge whether or not it would be worth my time, and all praised Boomerangs: How to Make and Throw Them:

4 of 4 people found the following review helpful. This is a 42 year old reprint of a book ...By James Harrison This is a 42 year old reprint of a book first published in 1937!!! It has you making "Boomerangs" by screwing 2 paint stirring sticks together! Not REAL boomerangs. Buy the book "Boomerang" by Benjamin Ruhe instead. 0 of 0 people found the following review helpful. great book By scorpio A great book on how to make boomerangs. 0 of 0 people found the

following review helpful. still a great guide to making your own proper boomerangsBy Alexander McKayA 'classic', first read this 30+ years ago, still in print, still a great guide to making your own proper boomerangs, that really return, and the author explains gyroscopic precession!

It only takes minutes to make a good, guaranteed-to-return boomerang. By following a few more simple steps you will learn how to throw it so it will always return to you. Soon you will be in possession of a new hobby, experimenting with many types of boomerangs, flying them in new tricks and stunts, achieving a degree of accuracy and excitement that will give you pleasure whether you are young or old, whether it is your first boomerang or your fiftieth. This is the outstanding book on boomerangs. While a certain amount of the information is drawn from native methods, most is composed of new designs by Bernard Mason that are easy to make, easy to throw, safe, and full of possibilities. There are the standards cross-stick boomerangs ranging in size from fourteen inches to three feet. There are pin-wheel boomerangs, undoubtedly the best flyers. There are boomabirds, boomerangs in bird shapes, airplane shapes, and other ornamentals with a wealth of strange flight patterns. There are tumblesticks, boomerangs that look like nothing but simple straight sticks until you throw them. There are boomerangs you can make from cardboard. And there are the curved stick boomerangs from Australia. In each section there are examples of the best flyers, plus others largest, smallest, jumpers, fast flyers, smooth flyers, and many more. Since, as the author says, each boomerang possesses its own unique character, there is always the feeling of magic each time a new one is made and thrown. With this book you can learn to make nearly every type of known boomerang, learn to fly them, and add a new area of skill and recreation to your life.
