LBTCindy's book about Candles introduces you to the craft of making your own candles. From votive candles to scented candles you can experiment with different styles, hues and shapes to make the perfect candle for any occasion. I found this a great inspiration because I am hoping to start trying the craft of candle making yet struggle with many creative ideas!

In this short, but informative book you will learn how to make your candles. Whether you are looking for a particular theme or you want to customise to suit a certain room in your house/office. You will also learn how to make that perfect romantic setting with candles, or how to choose that perfect gift for a birthday, or other occasion. If you are really into candle making this book will even give you tips on how to make a profit in your candle business.
