By Parker House
This was a nice compliment to the Vol I book by the Truitts. If you are only going to buy one of the two books, I would suggest buying Vol I.

By John K Bowman
Excellent book with very good photos of examples of various types of glass produced during the period. We found it very useful for picking trips to antique stores, flea markets and consignment stores. We always take the book with us!

By Scott Davis
A beautiful book but far from complete. I was shocked to see that Ingrid glass was completely ignored, only because it isn't signed by the manufacturer and some pieces are currently still made. Many other Bohemian manufacturers are also overlooked. You'll surely see some pieces you never knew existed though. Unfortunately not the difinitive resource you'd hope for. Maybe a book 3 is in order.
